

cognite™

Your thinking learning place.

➤ Expand the power of Cognite™ with more than 60,000 trusted websites and standards-aligned resources

Cognite creates a rich K-12 learning experience by expanding library, web and digital resource access to the classroom and the home. It allows students, teachers and parents to share information and resources, leveraging the educational materials you already use in new ways.

Follett Software's WebPath Express™ and Standards services integrate with Cognite to provide even more opportunities to enhance learning. WebPath Express works with Cognite to guide students to quality, relevant K-12 websites. The Standards service helps teachers and media specialists find and access resources that align with district and state standards. Together, these tools allow educators to get the most value out of their resources, facilitating improved instruction, parental involvement and student success.

Equip teachers.

- Access 60,000+ trustworthy and relevant K-12 websites, integrated directly into your library and classroom resources
- Streamline planning through easy identification of library materials and web resources for curriculum development 24/7
- Foster student achievement and target performance goals with additional resources that help you adapt curriculum to student's individual learning style
- Search website content and deliver grade and reading skill-level appropriate results
- Bring standards-aligned curriculum guides into Cognite to align lessons with district learning objectives
- Identify and report on heavily accessed topic areas for making informed curriculum and collection development decisions
- Save time by using a single interface that provides fast access to relevant results
- Enable teachers to create project spaces for collaboration

Empower students.

- Help students develop critical learning skills with a safe, educator-approved collection of websites that support any research effort
- Give students access to trusted, age-appropriate websites without the "noise" of the web
- Deliver learning with a highly interactive experience
- Allow them to collaborate easily on projects
- Let students spend less time searching and more time learning

Involve parents.

- Involve parents in their children's education by giving them easy access to web resources from home or work
- Provide them with the security of knowing that their children are searching in a safe, educator-approved environment
- Connect parents to the same high quality, research-friendly websites to which their children connect
